Note 1: Full-Time Equivalent (FTE) student enrolments are calculated (a) by assigning to each course a fraction representing the weighting it has in the curriculum of a qualification, and (b) by multiplying the headcount enrolment of that course by this fraction.

Note 2: FTE contact students are those who are registered mainly for courses offered in contact mode.

Note 3: FTE distance students are those who are registered mainly for courses offered in distance mode.

Note 4: Definitions for fields of study employed here are the same as those employed in Table 3.

Note 5: The totals above include undergraduate and postgraduate courses.

Note 2: Definitions of formal qualifications are the same as those employed in Table 3.

Note 1: The graduation rate is the number of graduates in the 2012 academic year at the level of undergraduate degrees and diplomas, Master's degrees and Doctoral degrees, expressed as the percentage of total enrolment for 2012, at the level of degree/ diploma, Master's degrees and Doctoral degrees.

Note 2: These graduation rates serve as proxies for throughput rates of cohorts of students. A detailed account of benchmarks related to these graduation rates can be seen in The National Plan for Higher Education (Department of Education: 2001).

Note 3: The benchmarks in the National Plan were set on the basis that at least 75% of any cohort of students entering a programme should complete their degrees or diplomas. When converted to graduation rates, the cohort throughput rates in the table above are equivalent to graduation rates of, broadly, the following kind:

	<u>Undergraduate</u>	<u>Doctoral</u>
Contact programmes	25%	20%
Distance programmes	15%	15%

Note 4: As a result of rounding off, numbers and percentages may not necessarily add up.

Note 5: Graduation rates include graduates and diplomates.

Note 1: Undergraduate courses are those coded as lower prediplomate/ undergraduate, intermediate prediplomate/ undergraduate, and higher undergraduate.

Note 2: Success rates are determined as follows: a calculation is made of FTE enrolled student totals for each category of courses. A further FTE calculation, using the same credit values, is made for each category of courses for those students who passed the courses. The success rates are then determined as FTE passes divided by FTE enrolments. The success rates shown are, therefore, weighted averages for contact and distance courses for each population group.

Note 3: As a result of rounding off, numbers and percentages may not necessarily add up.

Note 4: "n.a." means "not applicable".
